

- NICE (a), NICE from the uniform start (b)
- x- twin run, exact condensation (a)
- exact compliance of the NICE design (a)
- ★ homogenisation design, NICE (b)
- NICE from the homogenisation design (b)
- ... final NICE value from the uniform start (b)

- $V > V^*$ (b: run from the uniform start)
- range enlarged in the lower strip (b)

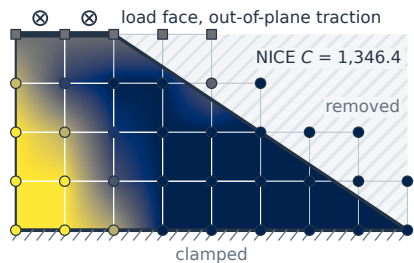

(a) Case A: 2x2x2 block

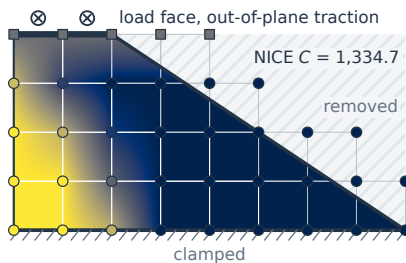

(b) Plates B1 and B2

(c) Final design B2

(d) Final design X-z

(e) Scale demonstration

[TBD-SCALE: time and memory per design iteration against the number of cells]
